

# OutSystems Overview

---

Introduction to the course

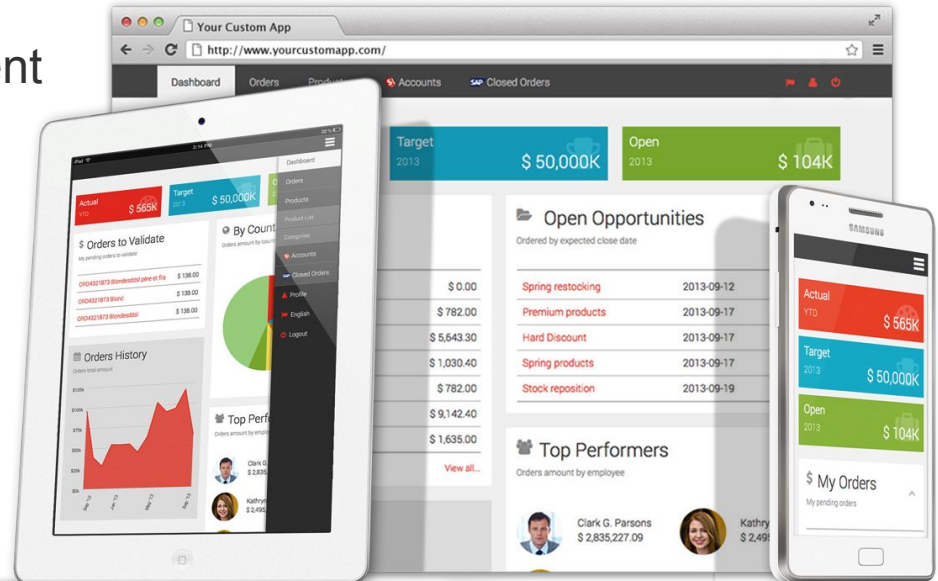

# Course Topics

- What is OutSystems?
- Upcoming sessions
  - OutSystems components and tools
  - OutSystems capabilities
  - Service Studio
    - Getting started
    - Workspace layout
    - Resource and tools
    - 1-Click publishing

# OutSystems

Enables the development and delivery of enterprise web and mobile applications

- Low-code development environment
- Enterprise grade, full stack system
- Integrate with existing systems
- Built-in management & analytics

# Forrester Wave: Mobile Development Low-Code (Q1)

# Gartner MADP Magic Quadrant (Q2)

Mobile  
Application  
Development  
Platform

# Forrester Wave: Low-Code Development Platforms (Q4)

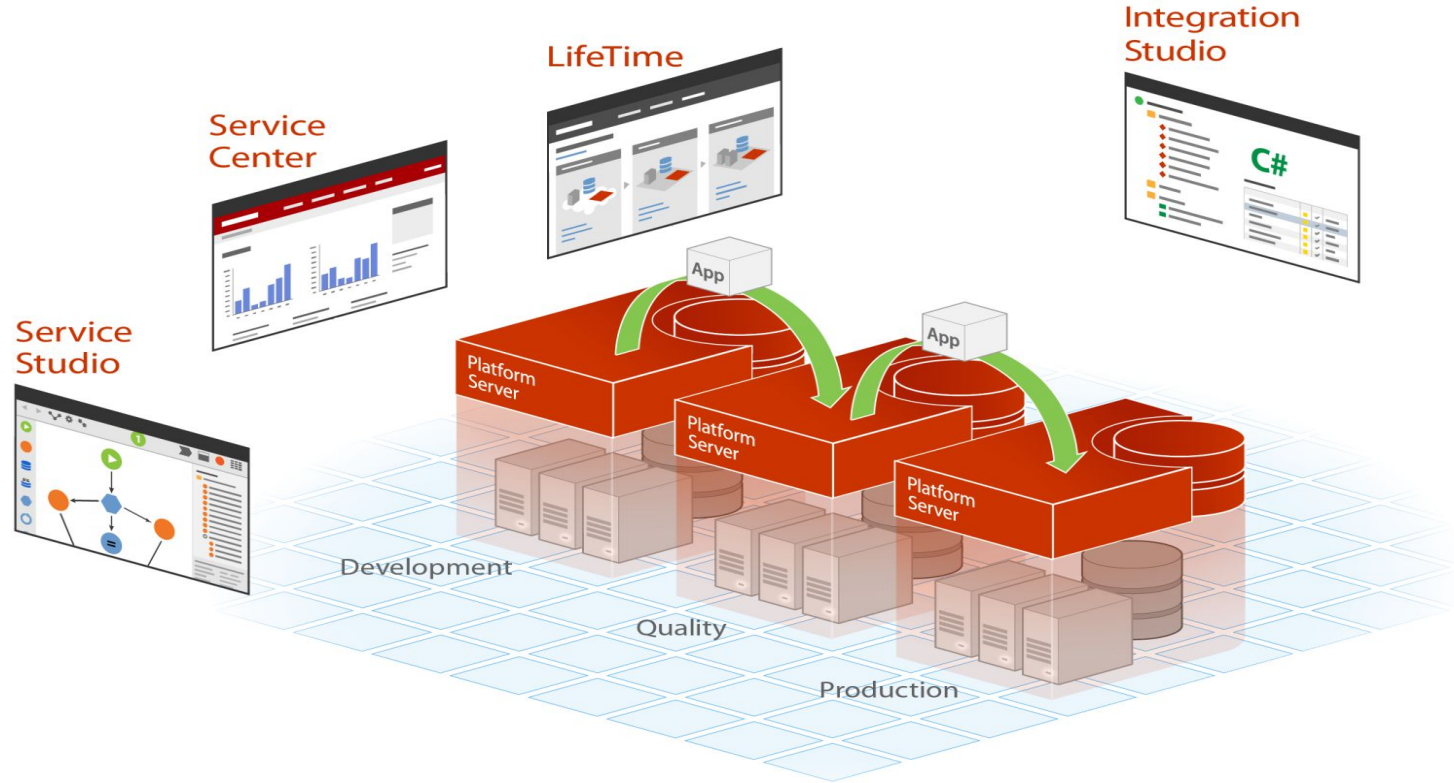

# Upcoming Sessions

# OutSystems components and tools

# OutSystems capabilities

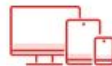

## 1. Unbeatable Speed

Visually develop your full-stack apps incredibly fast and deploy with one click

## 2. Integration With Everything

Easily connect your apps to any system (yes, any)

## 3. Great UX by Default

Deliver beautiful native mobile experiences and responsive web apps with ease

## 4. Low-code Without Constraints

Extend apps with your own front-end or back-end code - no lock-in

## 5. Built-in Security

Ensure your apps are safe all the way from design to deployment with the latest security features

## 6. Massive Scalability

Your apps will perform great regardless of number of users, complexity, or data volume

## 7. Unbreakable Deployment

Error-free deployment of your apps across cloud and on-premises environments

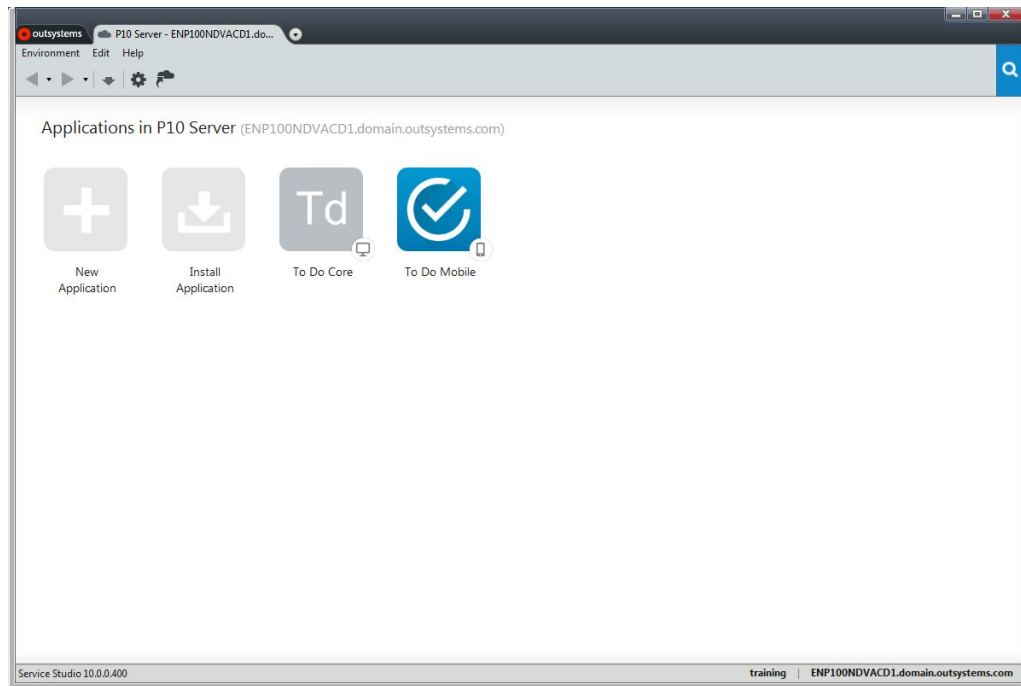

## 8. Metrics That Matter

Real-time performance dashboards to ensure an awesome user experience

# Service Studio: Getting Started

- Installing Service Studio
- Connecting to the server
- Create new applications
  - Web apps
  - Mobile apps

# Service Studio: Resources & Tools

# Service Studio: 1-Click Publishing

Sends the application definition to the Service Center app on the OutSystems Server

A long-exposure photograph of a city street at night, showing light trails from cars and streetlights, creating a sense of motion and speed.
